Question Three (25 marks)

(a) At the time of his retirement, Mr. Stark is given a choice between two alternatives: (a) an annual pension of $200,000 as long as he lives, or (b) a lump sum amount of $1,500,000.

If Mr. Stark expects to live for 20 years and the interest rate is 8 percent, compute the present value of both options to decide the option that Mr. Stark should take.

(6 marks)

(b) Marvel Limited is evaluating a project whose expected cash flows are shown in **Table 1**:

Table 1

Year	Cashflow
0	-400,000
1	100,000

Question Four (25 marks)

Mustafa and Associates is considering a project which requires an initial outlay of $100 million. The cost of capital is 12 percent and the expected cash inflows from these projects are found in **Table 2** below:

Table 2

Year	1	2	3	4	5
Cash flow in $ Millions	30	40	40	50	60

Calculate the following:

(a) Undiscounted payback period.

(6 marks)

(b) The discounted payback period by computing the values and copying and completing **Table 3** below in your answer booklet.

Table 3

Year	**Cash flow**	**PV of cash flow @12%**	**Cumulated PV ($million)**
